Recent Changes

Market volatility, as measured by the VIX index, continued to be high as the oil spill in the Gulf of Mexico turned political. All eyes were on BP as analysts calculated the cost of the clean up, the size of the fine the US will impose on the company and the probability of the company cutting its dividend. Elsewhere the new government in Hungary warned that the county's finances were in a worse condition than previously thought causing the Hungarian Forint to fall. Next week the UK coalition government will report its maiden budget. Last week our portofolios performed well despite our high cash reserves.
